

Photovoltaic panel 575w component size

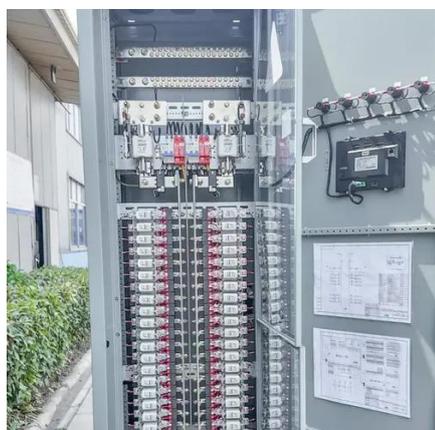

Overview

The solar photovoltaic panels 575w utilizes 144 (6x12x2) multi-busbar (MBB) N-TOPCon cells made from 182mm wafers. Bifacial. Based on Multi-busbar technology for better light trapping effect, lower series resistance and improved current collection. Mechanical performance up to 5400 Pa positive load and 2400 Pa negative load. Lower LCOE (Levelized Cost Of Energy), reduced BOS (Balance of System) cost, shorter payback. *Bifacial Gain: The additional gain from the back side compared to the power of the front side at the standard test condition. It depends on the mounting (structure, height, tilt angle, etc. 0 technology has better reliability. Note: Your Enquiry will be sent directly to Nantong Gamko New Energy Co. Detailed profile including pictures, certification details and manufacturer PDF . The Jinko 575W Solar Panel is a high-performance and durable solution for both residential and commercial solar power systems.
