

# Photovoltaic panel power station contract

## Overview

---

A solar PPA is a long-term contract between a solar services provider (or developer) and you (the home- or facility-owner). The provider installs a photovoltaic (PV) system on your roof or property and maintains it. A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider. Contracts are the most common form of contract used to undertake construction works on utility-scale solar projects by the private sector. The Project Company needs only to turn a key to start. What is a solar power purchase agreement (PPA)?

Read more about the benefits and considerations of Solar PPAs. As a solar professional, and inspiration to utilize EECEBG funding in the areas of energy planning, energy efficiency, renewable energy, transportation electrification, clean energy finance, and workforce development, including several high-level key activities. In this article, we're going to focus on a third option - the use of.
