

Photovoltaic panels on the shelf artifact

Overview

From Barcelona's solar-powered data sculptures to Tokyo's glow-in-the-dark installations, these creations are rewriting the rules of both renewable energy and public art. There is the often-photographed monumental solar canopy at the Parc del Fòrum in Barcelona, Spain, from way back in 2004. More recently, Gensler Architects have built an enormous hypostyle portico covered in solar panels at the Fifth + Tillery office in Austin, Texas. Not only do these brilliant pieces of artistic expression put stress on the innovative use of solar energy, but they also focus on the spiky subject of solar panel recycling. This post has been lightly updated in the spring of 2023 to add a few advances in technologies and applications.

Photovoltaic panels on the shelf artifact

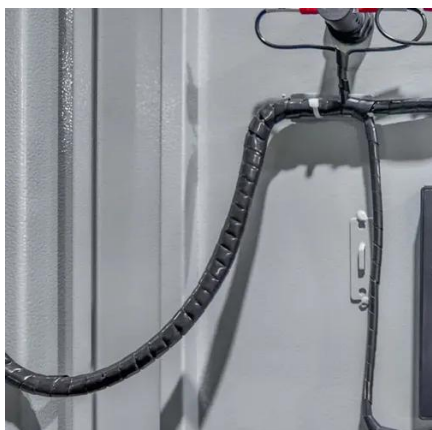

[Photovoltaics, Often Misunderstood as Visual Nuisances, Are ...](#)

What if a building's cladding material were entirely made of solar panels? More power to it! Added to the variety of panels is the variety of off-the-shelf mounting systems available, from minimalist to water ...

Building a photovoltaic panel artifact

This new breed of solar panel is incorporated directly into the building envelope. The sleek panels become an exciting new design element, proudly displayed for all to see.
