

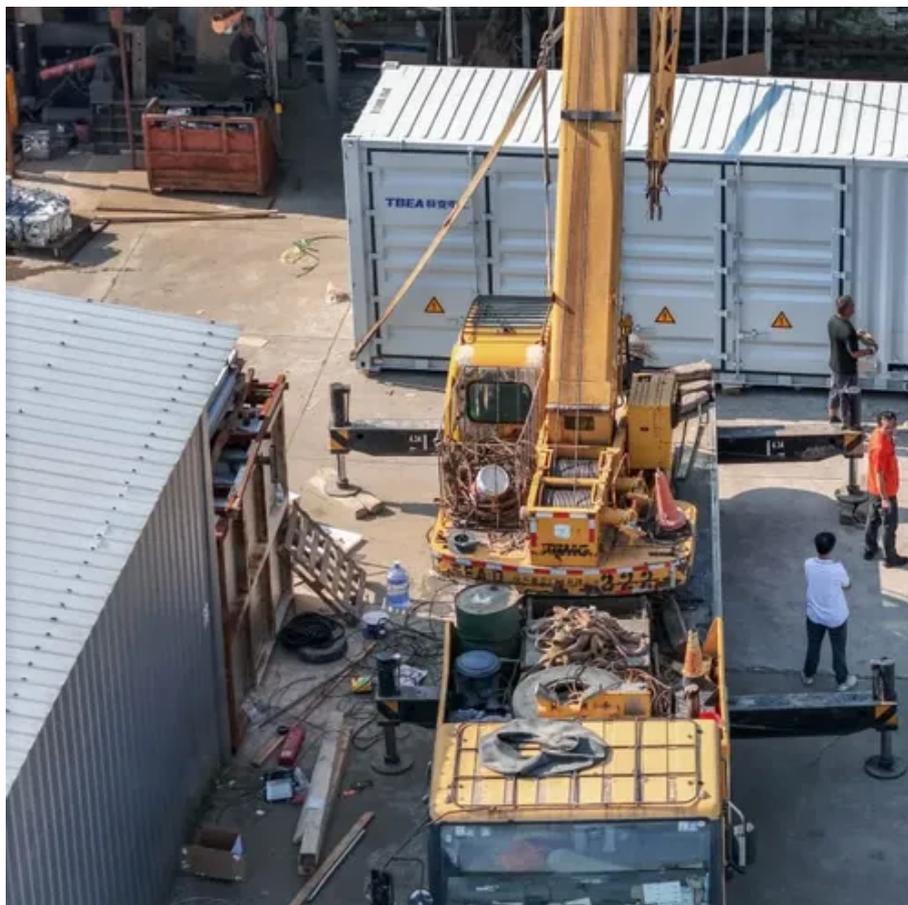

# Photovoltaic solar panel tax rebate rate

## Overview

---

The solar Investment Tax Credit (ITC) remains one of the most valuable federal incentives for homeowners considering solar panel installation in 2025. Currently offering a generous 30% tax credit, the ITC can save the average homeowner between \$8,000 and \$10,000 on their solar. If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. Get comprehensive ROI analysis and energy savings projections. Under this new law, homeowners who purchase their systems with cash or a loan will no longer be eligible for the 30% federal tax credit after December 31, 2025. Find out if you qualify and learn how to claim the solar tax.
