

# Photovoltaic support plant ground piles

## Overview

---

Driven pile foundations provide a stable base for solar panels. They are particularly cost-effective and adaptable in large-scale solar farms, commercial projects, and residential applications. Nuance Energy's Photovoltaic ground piles are essential components for supporting solar panel systems in outdoor installations, providing a stable and durable foundation. However, the long-term performance, safety, and financial viability of the entire project rest upon a component that is. When designing a solar ground mounting project, the foundation type is one of the most critical decisions to make.
