

Portable power bank for camping in Central Africa

Overview

I've tested multiple portable power banks in remote locations, and the top performers include the Jackery Explorer 1000 v2 with 1070Wh capacity for high-demand devices, the GRECELL 300W station offering 230.88Wh with efficient MPPT solar charging, and the compact P201 providing 148Wh. It only takes one dead phone battery to make you realize the importance of a power bank for camping. Whether it's snapping a picture of the local flora and fauna, setting an alarm for your sunrise hike, or pulling up directions for the drive home, it's essential that you have enough juice to last. Portable power banks come packed with other useful features besides charging. Many modern models have built-in LEDs, which help set up camp at night or in emergencies. Additionally, features like weather radios and emergency beacons are becoming more common and increase your safety outdoors. So whether you're after a small, lightweight pocket pal or a rugged, heavy-duty hero, there should be something for you.
