

# Prepaid solar home systems

## Overview

---

A prepaid solar lease is a financing model where a homeowner pays most or all of a solar lease upfront—typically 70% of system cost—in exchange for long-term solar energy production at a fixed cost and the option to eventually own the system, while a third-party owner claims the tax. A prepaid solar lease is a financing model where a homeowner pays most or all of a solar lease upfront—typically 70% of system cost—in exchange for long-term solar energy production at a fixed cost and the option to eventually own the system, while a third-party owner claims the tax. A prepaid solar lease is a financing model where a homeowner pays most or all of a solar lease upfront—typically 70% of system cost—in exchange for long-term solar energy production at a fixed cost and the option to eventually own the system, while a third-party owner claims the tax credit and. The end of the residential solar tax credit has forced homeowners to rethink how they pay for solar. Without federal incentives to help offset upfront costs, many homeowners are turning to solar leases and power purchase agreements (PPAs) —third-party ownership (TPO) arrangements that let you go. Prepaid solar leases and prepaid solar PPAs represent a compelling option for homeowners looking to invest in solar energy without the burden of ongoing monthly payments. You make a fixed monthly payment for a system that Tesla installs, owns and services. Key benefits of the Tesla lease include: Lowest monthly payment option compared to loans: Tesla internalizes tax credits and. A Prepaid Lease is a Third-Party Ownership model (TPO) where you make one lump sum payment when your system is installed. and then you're done.
