

Price of photovoltaic panels has increased

Overview

Wood Mackenzie's October 2025 analysis confirms that PV module prices are jumping approximately 9% in Q4 2025, with further increases expected through 2026. It represents a structural market correction that will reshape solar procurement strategies. A worker checks solar panels before packaging at a production facility in the Gansu province of China on April 16, 2024. Credit: CFOTO/Future Publishing via Getty Images 'An Unlikely Coalition' Failed to Expand Rooftop Solar in Wyoming. Lawmakers Plan to Try Again Somewhere in the tumult of the. In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry. : The spot price assessment for TOPCon over 600 W modules DDP US remained at \$0. To protect margins, lock in pricing early, diversify suppliers, and adopt high-efficiency HPBC and ABC modules. Though prices are rising, they remain relatively affordable compared to historical. A new wave of price increases is expected to hit the global solar industry following a major policy shift by China, the world's largest producer of photovoltaic equipment, with direct implications for Pakistan's fast-growing solar market.
