

Recent energy storage lithium battery prices

Overview

BloombergNEF's 2025 survey finds average lithium-ion pack prices dropped 8% to \$108/kWh, driven by LFP adoption, overcapacity, and competition. Stationary storage costs plunged 45%, EV packs averaged \$99/kWh, with China leading lowest prices. New York - December 9, 2025 - According to. New York, December 10, 2024 - Battery prices saw their biggest annual drop since 2017. The decline is driven by continued cell manufacturing overcapacity, intense competition, and a growing shift to lower-cost. Prices displayed in the chart and live price table for Lithium reflect the most recent available market data and are updated intraday during active trading hours. The analysis is updated less frequently and is based on consolidated, validated data sources, including settlement prices, benchmarks. In China, lithium carbonate futures on the Guangzhou Futures Exchange hit about 95,200 yuan (\approx \$13,400 USD) per metric ton. This marks a rebound from earlier lows caused by oversupply. Historically, lithium prices have been volatile. Benchmark Mineral Intelligence (BMI) and Intercontinental Exchange (ICE) offer.

Recent energy storage lithium battery prices

How cheap is battery storage? , Ember

Drawing on recent auction results from Saudi Arabia, India and Italy, along with in-depth interviews with project developers, suppliers and analysts across global markets, it captures the most ...

[Lithium Prices Today, Lithium Price Charts of Carbon Credits](#)

Lithium prices corrected sharply, driven by a speculative unwind following a recent rally. Markets are reconsidering the magnitude of near-term demand, as slowing passenger EV growth ...

[Lithium Prices Surge Amid Strong Demand Forecasts, Could Reach ...](#)

Source: Surge Battery Metals If advanced through feasibility, permitting, and construction decisions, NNLP has the potential to become a competitive, American-based lithium ...

[Global Lithium-Ion Battery Prices Hit Record Low at ...](#)

Lithium-ion battery pack prices fell to a record \$108/kWh in 2025, fueled by LFP adoption and global competition.

Global battery prices

The price of battery packs has decreased by 75 percent in the last 10 years, as this energy storage technology has become increasingly important in the electric mobility and renewable

[Lithium Prices , Lithium Carbonate & Hydroxide Price Data](#)

Lithium powers lithium-ion batteries for EVs, energy storage, and electronics. Trusted price data help producers and buyers meet rising demand in the global clean energy transition.

[Lithium-Ion Battery Pack Prices Hit Record Low at \\$108/kWh](#)

BloombergNEF finds 2025 lithium-ion battery pack prices dropped to \$108/kWh amid LFP shifts and overcapacity; China saw the steepest declines.

[Battery Prices Plunge as Grid Storage](#)

Smashes 2025 Goals and U.S.

Prices are falling faster than expected, grid-scale storage has already blown past its 2025 deployment target, and new mega-projects announced today--from the U.S. to Angola and ...

Lithium-Ion Battery Pack Prices See Largest Drop Since 2017, Falling ...

Lithium-ion battery pack prices dropped 20% from 2023 to a record low of \$115 per kilowatt-hour, according to analysis by research provider BloombergNEF (BNEF).

Lithium Prices Rise Again as Batteries, Extraction, and Supply Chains...

Recent price increases, however, driven primarily by strong electric vehicle demand in China and accelerating investment in stationary energy storage, suggest that lithium markets may be ...
