

Romania on energy storage systems

Overview

Privately held MASS Group Holding plans to invest more than €1 billion (~\$1.18 billion) in large-scale battery energy storage projects in Romania after reaching an agreement with the Romanian government, Reuters reported on Wednesday. The projects are intended to support Romania's power grid as Romania enters 2026 with renewed momentum across its solar and energy-storage markets — but also with a sharper sense of discipline. By storing energy during periods of low prices and using it at peak times or when prices are high, costs are optimized, and greater energy.
