

# Service life of outdoor solar water pump

## Overview

---

Solar water pumps, a key part of sustainable water solutions, typically last between 10 and 20 years. That can vary depending on how you use and take care of your pump. If you take good care of it and keep it well-maintained, your solar water pump can last a long time and give you. Sun Pumps are built for durability and long-term service in tough, off-grid conditions. Its longevity depends not on a single part, but on the quality of its three core components: the motor, the pump materials, and the intelligent controller. A simple yet scientific annual maintenance. We like to break down each piece of the system and say solar panels are rated to maintain current efficiency for 25 years, after that efficiency a bit, but still totally useable. Some customer are running.
