

Shipping costs for solar panels

Overview

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500. Whether you're a solar startup importing your first bulk order from Shenzhen or a do-it-yourselfer outfitting a container home in the Arizona desert, the cost of shipping solar panels in a container is more than just a line item — it can make or break your project budget. Alright so maybe it isn't THAT complicated. Because most solar panels have similar dimensions to those of a door, they have to be shipped on a pallet. Your freight is combined with other shipments. Shipping pallets are basically platforms designed to hold freight during transport and storage. Pallets come in uniform sizes, the most common being 40-inches by 48-inches. additional costs such as customs or insurance.
