

Single-phase inverter shipments worldwide

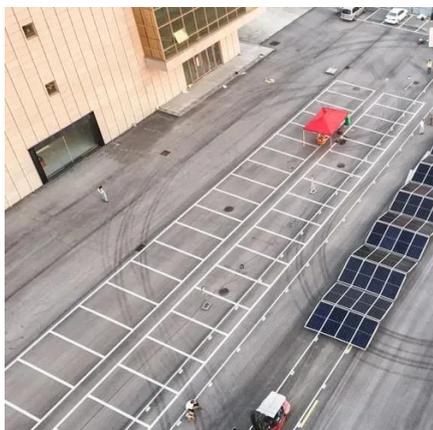

Overview

In 2024, global solar PV inverter shipments reached 589 gigawatts alternating current. The shipments feature a “single SKU” design intended to simplify inventory for distributors and installers. SolarEdge Technologies has begun shipping U. -manufactured. MILPITAS, Calif. (NASDAQ: SEDG), a global leader in smart energy technology, today announced the latest milestone in its international manufacturing and export strategy with the shipment of single-phase residential inverter products from its Austin. SolarEdge has started shipping US-made residential solar inverters to Europe - a milestone as US solar manufacturers look for export upside amid shifting trade rules, tariffs, and fading domestic manufacturing incentives. As a global provider of solar and energy storage solutions catering to residential, commercial, and utility-scale customers, we deliver value across the solar supply chain.
