

# Single-stage micro inverter

## Overview

---

The Microinverters are single PV panel low power inverters characterized by high power density and superior efficiency. The microinverter. This application report explores some of the prevalent topologies used in microinverters today, and the use of SolarMagic™ ICs in these demanding applications. In particular, the use of the SM72295 Photovoltaic Full-Bridge Driver is highlighted. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.
