

# Slovakia grid stabilization

## Overview

---

The European Investment Bank has provided a €350 million loan to modernize Slovakia's electricity distribution grid, funding upgrades to lines, substations, and smart technologies to improve reliability and support green energy goals. The fundamental document guiding the activities of the Office is the Regulatory Policy - a strategy that regulates the implementation of regulation during a fixed regulatory period. The ongoing 6th regulatory period, spanning a duration of 5 years until 2027, seeks to establish a sufficiently. Following the recent massive power grid failure in Spain, which paralyzed the country for 24 hours, Slovakia faces the challenge of securing its energy infrastructure during ambitious green transformation and growing cyber threats. Last month, Spain was plunged into darkness. A massive power grid. Slovakia's electricity distribution network is set for a major overhaul after the European Investment Bank (EIB) approved a EUR 350 million (USD 408 million) loan for the Zapadoslovenska energetika (ZSE) Group. These developments are reflected in the legislative and policy framework adopted under both the 'Fit for 55' package and the REPowerEU Plan. As a continuation of successful PCIs ACON and Danube InGrid, the project is designed to deliver significant benefits: network industry. These are in particular Decree No.
