

Solar Power Professor

Overview

My work focuses on the social and environmental dimensions of natural resources, land use change, and global production systems. Bio: I am a Professor of Environmental Studies at San José State University, one of the first six interdisciplinary environmental studies programs in the USA emerging out of the first Earth Day in 1970. Research in the area conducted. Say 'solar energy' and most people instantly think of those large panels that go on the tops of homes or vast structural arrays outside of buildings that are designed to collect the rays of the sun. The chemistry, engineering and nanotechnologies behind these materials and systems often play an. Professor Bae's research focuses on understanding and tailoring the physical and chemical properties of polymeric materials.

Solar Power Professor

[Solar Energy Laboratory , Name of Top Level Unit \(i.e. Department of](#)

The University of Minnesota's Solar Energy Laboratory specializes in fundamental science and applied research in the areas of solar fuels, thermal storage, solar heating, and advanced heat exchangers.

[Professor's Green Future Fellowship will help University drive forward](#)

Professor's Green Future Fellowship will help University drive forward sustainable solar technology Swansea University's position as a world leader in sustainable solar manufacturing is set ...

Solar Power's Bright Future

Their paper breaks new ground in studying the life-cycle cost of electricity generated by solar photovoltaic, paying particular attention to key factors such as location, public subsidies, and ...

Faculty

Jonas Nahm is an Associate Professor at the Johns Hopkins School of Advanced International Studies. Jonas' research interests focus on the intersection of economic and industrial policy, energy policy, ...

Dustin Mulvaney, Professor

The areas of expertise I work on include solar energy commodity chains, some of which is synthesized in my book Solar Power, Innovation, Sustainability, and Environmental Justice (University of ...

Team -- Space Solar Power Project

Howard Hughes Professor of Applied Physics and Materials Science; Director, Joint Center for Artificial Photosynthesis. Bren Professor of Electrical Engineering and Medical Engineering; Co-Director, ...

Solar and Renewable Energy Professors to Know

Meet solar and renewable energy instructors who are making strides in the field, and having an impact through research or instruction.

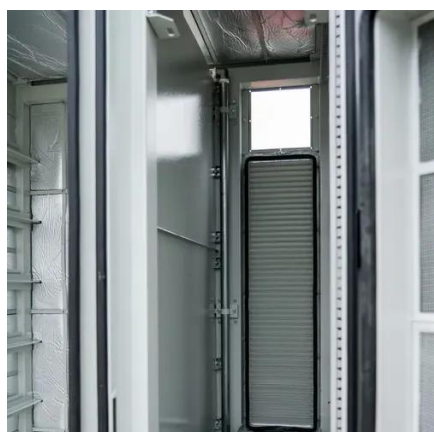

[What Powers John Abraham? The Answer](#)

May Be in His Backyard

University of St. Thomas engineering professor John Abraham, a globally known expert on climate change, is on a quest to make the world a better place. That quest begins in his very own backyard.

Faculty , Sustainable Power and Energy Center

By understanding defect interactions, the group works to reduce the cost of solar power and solar energy storage and pursues paths toward low cost, high volume manufacturing, researching the ...

Renewable energy, photovoltaics, photonics and optoelectronics

Renewable energy, photovoltaics, photonics and optoelectronics cover electrical and electronic devices that make use of light, such as renewable power generation and lasers. Applications in the field ...
