

Solar energy storage landing

Overview

Operating under a 15-year resource adequacy agreement with Pacific Gas and Electric Company that commenced on August 1, 2023, Moss Landing stores surplus renewable generation during periods of low demand and dispatches stored energy during peak load or supply shortfalls. The Moss Landing Energy Storage Facility, also known as the Elkhorn Battery, represents a significant advancement in the field of renewable energy. This facility is supported by PG&E and operated by Vistra Energy. It plays a key role in utilizing renewable resources through innovative technology. Power generation and retail company Vistra said yesterday (1 August) that the Phase III expansion. The Moss Landing Power Plant is a natural gas powered electricity generation plant as well as a battery energy storage facility, located in Moss Landing, California, United States, at the midpoint of Monterey Bay.

With completion of its third expansion in May 2023, the Moss Landing battery energy storage facility has become the largest of its kind in the world.

[The world's largest battery storage system just got even larger](#)

The Moss Landing Energy Storage Facility, the world's largest lithium-ion battery energy storage system, has been expanded to 750 MW/3,000 MWh.

Moss Landing Power Plant

Overview
Battery energy storage facilities
History
Connections to the California power grid
Natural Gas power generation

Utilities in California are required by a 2013 law to provide significant battery storage by 2024. The Moss Landing Power Plant site has since been chosen as California's primary location to provide battery based energy storage in order to better utilize renewable energy sources such as solar and wind on a grid-wide commercial scale. On June 29, 2018, Vistra Corp announced that it planned o...
