

Solar panels generate electricity and sell it

Overview

Solar net metering is a smart, rewarding way to get the most out of your solar panel system. It works by sending extra electricity your panels produce back to the power grid, sometimes even letting you sell solar energy back to the grid. In return, you earn credits that can lower. Net metering isn't direct selling - You're not actually selling electricity for cash, but receiving credits that reduce future utility bills. Most homeowners see \$600-1,500 in annual bill reductions rather than income payments. Location dramatically impacts profitability - With 34 states plus D. This excess energy can be sold back to the grid, providing additional income and contributing to a more sustainable energy system.

Solar panels generate electricity and sell it

[Solar Net Metering: Selling Energy Back to the Grid in 2026](#)

Solar net metering is a smart, rewarding way to get the most out of your solar panel system. It works by sending extra electricity your panels produce back to the power grid, sometimes ...
