

Solar power generation system of the Colombian factory

Overview

This article lays out a detailed financial model for establishing a 50 MW solar module assembly line in Colombia. While Colombia is known for its rich history in traditional energy sectors, a significant opportunity is quietly emerging, powered by some of the most consistent solar irradiation in the world. The Colombian government's goal to generate 30% of its energy from non-conventional renewable sources by 2030. With over 400,000 solar panels spanning an area of 437 hectares, La Loma, which is located in the department of Cesar, is Colombia's largest solar power generation plant. Most of this capacity is hydropower. The country has significant wind and solar resources. Latin American utility group Enel Colombia has started commercial operation of its 370-MWac Guayepo I & II solar farm complex in Colombia, solidifying its position as a leading solar energy producer in the country.

Opportunities
Trade Events
Since the government is developing several new power generation projects to accommodate growing demand through 2031, the outlook for the Colombian electricity sector is promising. The 2.4 GW Ituango hydro project that suffered from landslides and flooding of its powerhouse has a delay in its completion. The first unit one came online at the end of See more on trade.gov

Renewable energy in Colombia - Wikipedia

OverviewWindGeothermalBiomass

As of 2023, Colombia's renewable electricity generation capacity was 14.3 GW. Most of this capacity is hydropower. Solar power is growing fast, and in 2023 accounted for about 5% of the renewable capacity, up from almost zero five years earlier. The country has significant wind and solar resources that remain largely unexploited. According to a study by the World Bank's Energy Sector Management Assistance Program (ESMAP), exploiting the country's significant wind potential alone could cover more than the c...

Renewable energy in Colombia

Colombia has set targets for diversifying its energy mix by incorporating wind, solar, and geothermal resources. The country announced a net zero target at the COP26, as well as a nationally ...

Colombia solar electric power generation

From August 2023 to July 2024, Colombia's electricity generation showed a strong reliance on low-carbon sources, providing more than 60% of the nation's electricity. The lion's share of this came ...

La Loma Solar Project, Colombia

With over 400,000 solar panels spanning an area of 437 hectares, La Loma, which is located in the department of Cesar, is Colombia's largest solar power generation plant. With an installed capacity of ...

[Cubico reaches 300 MWp of operational solar PV in Colombia](#)

Cubico Sustainable Investments (Cubico), one of the world's largest privately-owned renewable energy companies, has put nine new solar PV projects into operation in Colombia through ...
