

Solar power plant Lego building

Overview

After announcing plans to build a dedicated off-site solar park near its headquarters in Billund back in 2023, the LEGO Group has, through this and other initiatives, increased its solar capacity by 61% globally over the past two years. Explore transfer, transformation, storage and dissipation of energy with reference to conversion of solar energy to electrical energy. Solar panels have the ability to convert solar energy into electrical energy. They are used to generate electricity for large utility grids, for satellites in space. Want to see more MOCS like this?
