

Solar power satellite factory in Auckland

Overview

The Ardmore solar farm is a photovoltaic power station near Ardmore in Auckland, New Zealand. When complete, the farm will generate 15 GWh of electricity a year, with a nameplate capacity of 13 MWp DC. [1]. Their innovative approach to deploying solar panels in space created the potential for larger surface areas for generating solar power in space. Developing a game-changing mechanism for the aerospace industry is a pretty high-level achievement (literally). But for entrepreneur Max Daniels. The modern world increasingly relies upon satellite-enabled services; those satellites rely on solar arrays for power. [nz/newsroom/astrix-astronautics-explores-power-generation-in-space/](https://www.nz/newsroom/astrix-astronautics-explores-power-generation-in-space/) Astrix produces inflatable deployment technology for space applications.

Solar power satellite factory in Auckland

Solar Energy - SEIA

Solar power is energy from the sun that is converted into thermal or electrical energy. Solar energy is the cleanest and most abundant renewable energy source available, and the U.S. has some of the ...

World-first NZ space technology soars into space

The technology uses solar power and superconducting electromagnets to move satellites around once they are in space. It meant no fossil fuel would be required for top-ups, and, ...

[Kiwi start-up Astrix Astronautics unlocks new possibilities for power](#)

Astrix produces inflatable deployment technology for space applications. This is used for mission-enabling, low-cost spacecraft solar arrays, high gain antennas for small spacecraft, and ...

[New 13 MW New Zealand-based solar farm goes live near south Auckland](#)

Auckland, New Zealand (NZ)-headquartered utility-scale and commercial rooftop solar installation company Kiwi Solar has announced its 13 MW Ardmore Solar Farm in South Auckland is ...

Home Solar Panels and Systems

Learn about installing and generating your own clean energy for your home with solar and home batteries.

[Solar energy , Definition, Uses, Examples, Advantages, & Facts](#)

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is ...

Ardmore Solar Farm

The Ardmore solar farm is a photovoltaic power station near Ardmore in Auckland, New Zealand. The farm is owned by Kiwi Solar. When complete, the farm will generate 15 GWh of electricity a year, with ...

[Astrix Astronautics: The Kiwi startup](#)

[sending scalable solar power](#)

Astrix is developing an innovative mechanism to deploy large surface areas in space. Currently, they're using that surface area for solar cells, allowing small satellites to carry a larger capacity for power.

Solar Energy

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar ...

[Astrix: unique inflatable space deployment , Callaghan Innovation](#)

Once in space, the unit releases gas into the inflatable tubes, deploying the solar array from the side of the satellite. The result is a solar array that is 20 times more space efficient, 4 times more mass ...

[To lower electric bills, consumers quietly install DIY solar](#)

Plug-in solar has remained in the shadows because of a lack of safety standards and often costly requirements imposed by utilities, but that's changing.

Solar power

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.

Solar Panels for Home in 2026 , Solar

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.

[Kiwi start-up Astrix Astronautics unlocks new possibilities for power](#)

Astrix Astronautics is a thriving participant in the \$350 billion global space industry. Their innovative approach to deploying solar panels in space created the potential for larger surface areas ...

Solar & Battery Solutions , Generac

Generac Solar & Battery Solutions provide a more powerful, resilient and smart way to manage your energy needs.

Astrix Astronautics - NZ Entrepreneur

Magazine

At Astrix we have developed a unique inflatable solar array for satellites, which dramatically increases the ease of generating power, reduces the cost of build and increases the ...

Engineering

Sub-assemblies have been assembled in various centres throughout New Zealand making this a truly nation-wide project. Fred Kennedy, ZL1BYP, in his role as lead engineer, has contributed ...

[Auckland.Scoop » Astrix Raises \\$500,000 From Outset Ventures To ...](#)

Founded by University of Auckland science and engineering students Fia Jones, alongside Will Hunter and Max Daniels, Astrix' inflatable solar array technology combines power ...

Support Customized Product

SOLAR , Division of Information Technology

Students use SOLAR to register for classes, print schedules, view and pay bills, update personal contact information, view transcripts, and submit student employment timesheets.

Residential Solar

Residential solar isn't just an environmentally conscious choice; it's a practical investment in your home's future. Here, you'll discover everything you need to know about installing and ...
