

Solar power satellite factory in Peru

Overview

Developed by Zelestra and completed in under 18 months, the plant delivers power to Kallpa Generación through a long-term PPA. Its projected annual output of 830 GWh is expected to power approximately 440,000 homes and prevent more than 166,000 tons of CO₂ emissions each year. The project will generate 830 GWh of clean energy per year, which will help Kallpa Generación to continue diversifying energy sources for its customers in the country. Peru has marked a significant milestone in its renewable energy journey with the inauguration of the San Martin Solar Park, the nation's first large-scale solar power plant. Located in the lush Amazon, this 300 MW project is the largest of its kind in the region.

Solar power satellite factory in Peru

[Peru Bets Big on Solar Power with San Martín Plant](#)

Peru's government and Spanish company Zelestra have officially launched the San Martín Solar Plant in Arequipa, making it the largest solar facility in the country.
