

The construction of new energy storage is accelerating

The construction of new energy storage is accelerating

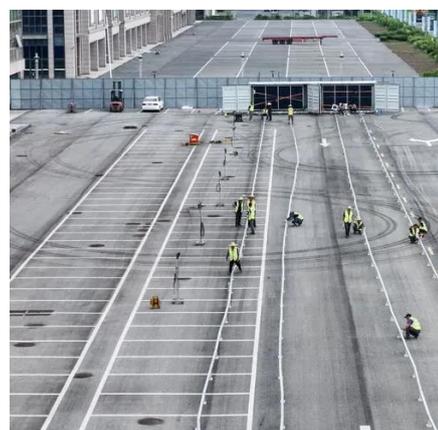

[Battery storage projects surge as utilities prepare for next grid era](#)

Government Market News , Mary Scott Nabers Insights , Battery storage projects surge as utilities prepare for next grid era in 2026 , Battery storage projects nationwide are accelerating ahead ...

[China unveils measures to bolster new-type energy storage ...](#)

According to the document, China will launch initiatives to boost technology innovation in the new-type energy storage sector. These initiatives will include measures to speed up the ...

[China National Energy Administration Released Official Report](#)

China's National Energy Administration (NEA) has released the China New Energy Storage Development Report 2025, marking the first official and comprehensive government report ...

CHINA'S ACCELERATING GROWTH IN NEW TYPE ENERGY ...

In terms of storage types, the dominant advantage of lithium-ion batteries continues to expand, accounting for 97.4% of the new type storage installation. Other types, such as air compression, and ...

[China unveils three-year action plan to boost new-type energy storage](#)

China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure ...

[Accelerating Development of New Energy Storage in China to Achieve](#)

It is crucial to advance the diversified development of new energy storage technologies, transitioning from pilot demonstrations to large-scale commercial applications, thereby accelerating ...

[FACT SHEET: The Energy Department Is Delivering On Accelerating ...](#)

July 16, 2025: The Energy Department announced the start of a new pilot program to accelerate the development of advanced nuclear reactors and strengthen domestic supply chains for ...

[China targets 180 GW of new energy](#)

storage by 2027 in ambitious ...

China aims to install more than 100 GW of new energy storage - primarily battery storage, excluding pumped hydro - by 2027, according to a new action plan presented by authorities ...

The development of new energy storage is accelerating.

According to the research report released at the "Energy Storage Industry 2023 Review and 2024 Outlook" conference, the scale of new grid-connected energy storage projects in China will ...

Global Energy Storage Boom: Three Things to Know

Despite policy headwinds earlier in the year, energy storage additions in China and the US are set to continue growing this decade. The removal of storage mandates in China for ...
