

The latest large capacity of photovoltaic panels

The latest large capacity of photovoltaic panels

[China has nearly 50% of the world's solar capacity: IEA](#)

In 2024, the global cumulative installed capacity reached 2.25 TW. It took more than 40 years to reach a cumulative capacity of 1.18 TW (in 2022), but just 2 years to double this. China now ...

[New report: World installed 600 GW of solar in 2024, could be](#)

By the end of 2024, solar PV made up 46% of global renewable capacity, with 2.2 TW installed. By 2030, we expect global installed solar PV capacity to exceed 7 TW by 2030. This would ...

Snapshot 2024

The global PV cumulative capacity grew to 1.6 TW in 2023, up from 1.2 TW in 2022, with from 407.3 GW to 446 GW [1] of new PV systems commissioned - and in the order of an estimated 150 GW of ...

Installed solar energy capacity

Total renewable capacity (on-grid and off-grid)
Hydropower Renewable hydropower (including mixed plants)
Pumped storage (note that this is included in total hydropower capacity, but ...

[IEA: World reaches 2.2TW of cumulative installed ...](#)

The world reached 2.2TW of cumulative installed solar capacity in 2024, with China alone accounting for 1TW of total operating capacity.

World's 10 biggest solar power projects ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

Most powerful solar panels 2025

Over recent years, a battle emerged to develop the world's most powerful solar panel, with many manufacturers developing panels rated well over 600W while others are fast-tracking next ...

Solar PV

Find up-to-date statistics and facts on the global solar photovoltaic industry.

[Global installed photovoltaic capacity exceeds 2,260 gigawatts in ...](#)

According to the report, global installed photovoltaic capacity rose to between 553 gigawatts and 601 gigawatts by the end of 2024 - a new record. Compared to 2023, this represents ...

[Global solar installations surge 64% in first half of 2025](#)

World installed 380 GW of new solar capacity in first six months of 2025 Global solar installations are on track for another record year. In the first six months of 2025, the world added 380 ...
