

The photovoltaic solar panel is broken

Overview

If you suspect solar panel damage, the first thing to do is contact the installation company or another qualified solar energy system repair outfit. The technician can accurately evaluate the type of damage and the extent of the problem. There are a few ways to detect damage to your solar panels. A visual inspection may reveal broken or cracked glass, a problem with the frame or mounting or damaged or disconnected wiring issues. In this article, we go in-depth. Will a panel still work even if it's been cracked?

Most solar cells will continue to produce a current even after they've been cracked. This current should still be usable, but your panel won't operate at maximum voltage.
