

# Transmission node uses a 400V intelligent energy storage cabinet

## Overview

---

Our system is versatile, compatible with 400V grid systems, and supports a range of applications including peak-shaving, demand control, backup power, and frequency regulation. It also offers monitoring and fault recording capabilities. Each All-in-One (AIO) cabinet is designed as a fully independent energy storage unit, integrating all critical subsystems required for real-world operation: FFD POWER's All-in-One BESS has been successfully deployed in over 30 countries, mastering complex energy challenges across the globe. Our experts lay out low-voltage power distribution and conversion for a battery energy storage system and assets monitoring - for a utility-scale battery energy storage system installation to perform the necessary actions to adapt this reference design for the project requirements.
