

Tunisia s first batch of power base stations

Overview

Revised in September 2024, this map provides a detailed view of the power sector in Tunisia. Tunisia has a current power production capacity of 5,944 megawatts (MW) installed in 25 power plants, which produced 19,520 gigawatt hours in 2022. State power utility company STEG The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer. Sousse thermal power station, combined gas cycle belonging to STEG. Consequently, the Mornaguia Power Station was developed to help stabilize the 496.

Tunisia s first batch of power base stations

Energy in Tunisia

The British company TuNur Ltd proposed a major project in solar energy in 2010s, which would consist in building in stages 4,500 MW of thermodynamic solar power plants in southern Tunisia, and export ...

El Biban Power Plant, Tunisia - CME Energy

CME Energy led the development of the El Biban power project in Zarzis, Tunisia with partners Caterpillar Power Ventures International and Centurion Energy. The 27 MW cogeneration electric ...

Tunisia

Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

[Tunisia's power infrastructure - September 2024 , African Energy](#)

Power generation data was drawn from our African Energy Live Data platform, which contains project level detail on power plants and projects across Africa. The map is presented as a ...

[Chinese-built solar photovoltaic power station inaugurated in Tunisia](#)

Construction of the power station started in May 2024, carried out by a consortium of Chinese companies.

[Tunisia 2025 Hybrid Energy 5G Base Station Hybrid Power Supply](#)

Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

Nss power station Tunisia

Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

Mornaguia Power Station

Financiers: In 2015, SFD and IsDB partnered with the Government of Tunisia, together providing USD 94 million in loans, which accounted for approximately 40% of the total project cost of USD 230 million.

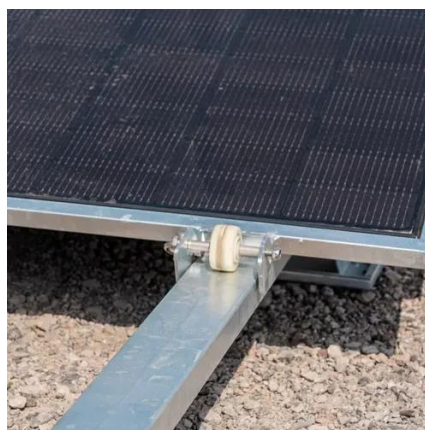

Power Sector Transition in Tunisia

In 2020, natural gas made up 86% of Tunisia's installed capacity and 95% of power generation, while renewable energy made up 13% of installed capacity and 5% of power generation.

Energy in Tunisia

Overview
Electrical sector and renewable energies
Oil and gas upstream sector
Downstream sector
Nuclear

The International Energy Agency reports for 2014 an electricity production of 19 TWh, compared to 10.5 TWh in the year 2000. The Tunisian Company of Electricity and Gas (STEG), a public company, ensures the three quarters of production. The network operates at 50 Hertz and the voltage at the domestic level is 230 Volts. Virtually all Tunisian electricity (18 TWh) is produced by thermal power plants burning natural gas, the l...

Tunisia's energy infrastructure , African Energy

The locations of power generation facilities that are operating, under construction or planned are shown by type - including gas and liquid fuels, natural gas, hybrid, hydroelectricity, solar ...
