

Ultra-large capacity energy storage containers for oil platforms

Overview

In response to fast-growing global energy demands, from AI-driven data centres to industrial electrification, TENER Stack is engineered to help utilities, developers, and industrial users unlock greater economic value from every square metre of installation. This innovation marks another milestone for CATL in the energy storage sector, following. Landmark innovation pairs high capacity with flexible transport, redefining large-scale energy storage

MUNICH, May 7, 2025
/PRNewswire/ -- CATL today unveiled the TENER Stack, the world's first 9MWh ultra-large capacity energy storage system solution set for mass production at ees Europe 2025. CATL has unveiled the TENER Stack, the world's first 9MWh ultra-large capacity energy storage system solution set for mass production at ees Europe 2025, representing a strategic leap forward in capacity, deployment flexibility, safety, and transportability. It also has the energy storage capabilities to charge 150 EVs. Designed for mass production, the innovative system represents a major step forward in addressing growing global energy needs, from.
