

# Uninterruptible power supply equipment power supply time

## Overview

---

UPS hours refer to the amount of time a UPS can continue supplying power to connected devices during a power outage. This duration depends on various factors such as the battery capacity, load requirements, and UPS system efficiency. An uninterruptible power supply (UPS) or uninterruptible power source is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails. It conditions incoming power to ensure clean and. An uninterrupted power supply (UPS) also referred to as a power system (UPS), is designed to provide electricity to a device in the event of a power outage or disruptions, in the power source. Knowing how to calculate this can help you select the.
