

# Uninterruptible power supply has a peculiar smell

## GRADE A BATTERY

LiFepo4 battery will not burn when overcharged over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

## Overview

---

If your PSU smells like something burning, that's a sign it's defective, and you should replace it. Microcenter is usually pretty good with returns, so don't hesitate to swap it out if you're. After about 30 minutes of being in battery mode, the fan kicked in and I could smell this odd rubbery/metallic/chemical smell coming from the vents. I tested this 3 separate times. Any type of google search basically. A fan running at high speed continuously usually indicates an abnormal internal temperature or current for error code portable ups power supply, while a burning smell often means that the circuitry or battery pack has begun to experience thermal damage or a chemical reaction—situations with which. Today i received my new EVGA BQ 650W, and it has a really weird plastic smell, like chemical, is that okay ?

or should i return it ?

Today i received my new EVGA BQ 650W, and it has a really weird plastic smell, like chemical, is that okay ?

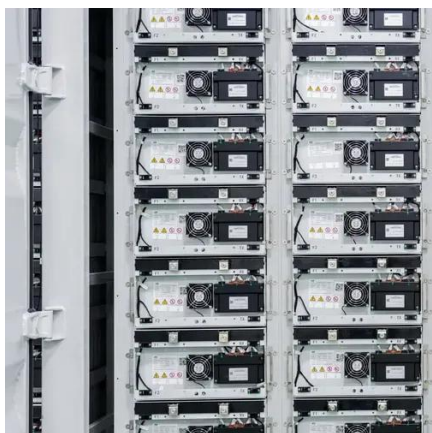

or should i return it ?

Probably perfectly fine. Normal. I just unpacked a brand new power supply unit (PSU) from Microcenter, and it has a strange, off-putting odor that reminds me of a zoo or manure. Is this common for a PSU straight from the factory?

I checked, and the box and cables don't have any bad smells, so I'm certain it's a new product.

## Uninterruptible power supply has a peculiar smell

### Is it normal to smell a little burning inside of a power supply?

It might have just been some dust if the PC hasn't been on for a while, but since you said it was like a plastic smell it's not worth the risk to your other components or the possible fire risk in a worst-case ...

### Is it normal for a new power supply to have a strong smell?

Yeah, it's totally normal for new power supplies to have a weird smell when you first get them. Don't sweat it too much! It usually fades over time as the components settle in.

### **[SOLVED]**

New electronics are likely to have just a bit of odor when first turned on and heated up. The problem should not continue barring some defect or improper power connection. Do not, under ...
