

Uruguay s largest energy storage power station

Overview

At 500 MW, it's South America's largest single-site storage facility – equivalent to powering 350,000 homes. What makes lithium-ion ideal for this application?

High cycle life (6,000+ charges), fast response times (<100ms), and declining costs (down 89% since 2010). As global energy markets shift toward sustainability, Uruguay is emerging as a pioneer in lar Imagine a giant battery that could store enough renewable energy to power entire cities during peak demand. These two neighbors aren't just competing in football – they're leading South America's energy storage revolution. With Uruguay already generating 98% of its electricity from renewables and Argentina sitting on enough lithium reserves to power half the world's batteries, their joint energy storage. Uruguay has emerged as a global leader in renewable energy integration, with its energy storage power stations playing a pivotal role in stabilizing the grid. Over 98% of the country's electricity now comes from renewables, primarily wind and solar. The country seeks to identify additional domestic uses for excess electricity and potent istributed in most departments of the country. The electric vehicles sold in Uruguay have Type 2 connectors according.
