

Wa house with solar photovoltaic power generation

Overview

The average Washington homeowner needs a 14.03 kW solar panel system to cover their electricity needs, which comes out to \$37,580 before incentives. While this may sound high, it will. Over the past decade, the cost of a solar electric system (solar PV) has dropped significantly. With the advent Made-in-WA solar components and a production incentive rate paid to WA property-owners who install grid-tied solar, the numbers of homes with new solar systems in our state has. You'll need to install a 14. When you generate more electricity than you need, City Light credits. Washington is known for its rainy weather, but it still gets an average of 152 days of sun per year, which is more than enough to generate significant amounts of solar power.
