

Waterproof off-grid solar energy storage cabinet for rural use

Overview

Durable waterproof sheet metal cabinets for lithium battery and solar storage systems. Customized design, weather protection, CNC cutouts, and fast delivery. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. This place is called a "battery enclosure", or what is. AZE's all-in-one IP55 outdoor battery cabinet system with DC48V/1500W air conditioner is a compact and flexible ESS based on the characteristics of small C&I loads. From no access to electricity to protecting against load shedding, OffGridBox™ is helping NGOs, businesses, and homeowners become more sustainable, secure.
