

# What are the electroelastic solar energy storage cabinet systems

## Overview

---

These systems are designed to store surplus energy generated by solar panels during the day for use when sunlight is unavailable, such as at night or during cloudy periods. This maximizes self-consumption of your solar energy, reducing reliance on the grid and lowering electricity. Energy storage cabinets are essential devices designed for storing and managing electrical energy across various applications. As we advance towards integrating more renewable energy sources, the SOFAR Energy Storage Cabinet adopts a modular design and supports flexible expansion of AC and DC capacity; the maximum parallel power of 6 cabinets on the AC side covers 215kW-1290kW; the capacity of 3 battery cabinets can be added on the DC side, and the capacity expansion covers 2-8 hours. This article explores their core functions, real-world applications, and how they address modern energy challenges. Discover why businesses worldwide are adopting this.
