

What kind of battery is used for amorphous inverter

Overview

AGM (Absorbent Glass Mat) Batteries: AGM batteries are a type of sealed lead-acid battery that uses a glass mat separator to absorb and hold the electrolyte. They are maintenance-free, provide high performance, and are suitable for applications where space is limited. Most of your home devices—from televisions to refrigerators—run on AC. The wrong kind of battery may damage your inverter. Now, if you wonder what kind of battery you should use for your sine wave inverters, you must first. The best batteries for inverters typically include deep cycle lead-acid batteries, lithium-ion batteries, and AGM (Absorbent Glass Mat) batteries.
