

What to do if the photovoltaic panel roof leaks

Overview

Signs of a roof leak under solar panels include water stains, damp odors, water pooling, and decreased energy production. To fix a roof leak, identify the source, repair the roof, inspect and upgrade the mounting system, and reinstall and seal the solar panels properly. After all, your solar installation was meant to enhance your home's efficiency, not compromise its integrity. But don't worry—you're not alone, and this issue is more common than you might think. Understanding common causes, how to spot problems early, and the best mitigation strategies helps homeowners protect their roof, preserve your investment, and maintain system. If your roof leaks after a solar installation, understanding the resolution process is key.
