

# What to do if the photovoltaic panels do not carry load

## Overview

---

Solar adds point loads and uplift forces that your roof system must safely carry. We verify deck thickness and condition, look for prior overlay layers, confirm fastener schedules at ridges and hips, and review rafter spans or truss details when accessible. What does this mean to you as you consider putting solar panels up on your roof?

Do you need to worry about the weight?

about 2- to 4-pounds per square foot. You don't have to worry. A solar panel with no load isn't connected to any devices. It has voltage, but no current is flowing. This is particularly dangerous in coastal or mountainous regions.

## What to do if the photovoltaic panels do not carry load

### [Solar Panel Not Working? How to Diagnose & Fix Common Issues](#)

Is your solar panel not working? Learn how to diagnose common issues and apply effective troubleshooting tips to restore peak efficiency. Keep your solar system running smoothly!

### **CAN YOUR ROOF HANDLE THE WEIGHT OF SOLAR PANELS?**

The roof must be able to support the sum of its dead load and any anticipated live load, so the roof has to be designed with a load limit that takes into account both of these loads.

### **10 Common Solar Panel Problems and Solutions**

Some problems can be fixed on your own, but others may require the services of a professional technician to provide repairs. The key is to identify the problem and determine what ...

### [How to Troubleshoot a Solar System: 5 Easy Steps to Fix It?](#)

In this guide, we'll walk you through five easy steps to troubleshoot common solar system problems, from panels to batteries to inverters. Whether you're a solar newbie or a DIY pro, this article has you ...
