

# Where to install photovoltaic panels on rooftops to generate electricity

## Overview

---

Typically, solar panels perform best on south-facing roofs with a slope between 15 and 40 degrees, though other roofs may be suitable too. You should also consider the age of your roof and how long until it will need replacement. Rooftop solar power, also known as rooftop photovoltaic (PV) systems, refers to solar panels installed on residential or commercial building rooftops to generate electricity. Solar panels, an efficient and versatile energy source, have grown in popularity for a variety of applications, from residential rooftops to large-scale power. Whether you're looking to cut electricity bills, reduce your carbon footprint, or become energy independent, a solar power system on your rooftop can help you achieve those goals. ## What Does "A Solar Panel On The Roof Of A House" Really Mean?
