

Why has the price of photovoltaic panels increased recently

Overview

Wood Mackenzie's October 2025 analysis confirms that PV module prices are jumping approximately 9% in Q4 2025, with further increases expected through 2026. It represents a structural market correction that will reshape solar procurement strategies. Somewhere in the tumult of the global economy in recent months, solar panel prices hit bottom and then began to rise. The global solar module industry is expected to regain a sustainable balance in the next six months, Yana Hryshko, head of Solar Supply Chain Research for Wood Mackenzie, told pv magazine. This shift is influenced by various factors, including international market dynamics and domestic policy changes. Solar panel prices are rising again. To protect margins, lock in pricing early, diversify suppliers, and adopt high-efficiency HPBC and ABC modules.
