

Wind power available for the day

Overview

Use WeatherPower graphics to show daily wind and solar electricity generation based on weather of the day and installed capacity in your area. One megawatt-hour powers roughly 33 homes for a day. This site uses cookies to ensure you get the best. This page provides current information on Generation Resources, including forecast and actual generation for Wind and PhotoVoltaic (Solar) Generation Resources; Resource Outages; Reliability Unit Commitment (RUC) constraints; Reliability Must Run (RMR) Resource deployments; Fuel Type; and aggregate.

Wind power available for the day

Global Wind Atlas

The mean wind speed is a measure of the wind resource. Higher mean wind speeds normally indicate better wind resources, but mean wind power density gives a more accurate indication of the available ...

Wind Energy , Department of Energy

Wind power or wind energy is a form of renewable energy that harnesses the power of the wind to generate electricity. It involves using wind turbines to convert the turning motion of ...

Maps and Data , Department of Energy

Find maps and charts showing wind energy data and trends.

Today's Outlook , Demand , California ISO

Net demand trend System demand minus wind and solar, on a 5-minute average, compared to system and forecasted demand.

Combined Wind and Solar

Combined Wind and Solar is a graphical representation of estimated wind and solar power production amounts for the Current Operating Day and the Next Day.

[STWPF for Current Day Forecasted and Actual Wind Power Production](#)

This page provides forecasted and actual wind power production data for the current day in the ERCOT system.

Generation

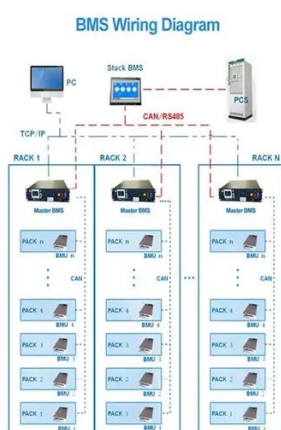

Intra-Hour Wind Power Forecast (IHWPF) by wind region that provides a rolling two hour, five minute forecast of ERCOT-wide wind production potential.

Wind Watts , NLR

WindWatts offers quick, approximate wind resource estimates. For more detailed or location-specific data, consider reaching out to local wind installers who may share insights from nearby projects. To ...
